

AJIAL BILINGUAL SCHOOL GRADE 5 NEWSLETTER

Dear Family,

In English Language Arts students will be working on the Travel Brochure Project. The activity requires children to think about details from a place they have visited or a place they might want to visit. Students will be conducting Internet and book research and even interviews as they gather information. Then, students will take that information and turn it into a travel brochure. In both cases, they will find information, select relevant facts, create an interesting layout, and write for others or themselves to read. Through this activity students will have a chance to learn some skills that are vital to good writing and some new computer skills as well.

Throughout the next few weeks, our math class will be learning about multiplying fractions and mixed numbers. We will also be using area models to help understand fraction multiplication. You can expect to see homework with real-world problems that involve multiplication with fractions and mixed numbers.

The big idea we are exploring in our Unit 7 in Science is that natural resources are essential to life and must be used with care. The Earth provides all of the resources that sustain and enhance human life. Plants, animals, water, air, soil, and rock provide food energy, nourishment, and oxygen needed for life, as well as materials for building shelter and making clothing. Fossil fuels and wood are harvested and burned in order to provide the energy we need to cook food, produce heat and electricity, and provide transportation. Be a part of our exploration!
