

AJIAL BILINGUAL SCHOOL GRADE 5 NEWSLETTER

Dear Family,

This week in English Language Arts besides review, students will be completing an autobiography. They will be required to complete a daily assignment that is all about them. Each lesson will focus on a specific skill. At the end of the week students will have to submit their work.

During the next week, we will continue learning about dividing three- and four-digit whole numbers. We will also learn how to interpret remainders. You can expect to see homework that provides practice with division of three- and four-digit dividends by one- and two-digit divisors.

In Science we begin Unit 3 Cells to Body Systems. All living things are made up of cells. Cells make up tissues, tissues make up organs, and organs make up organ systems. The function of an organ system depends on the integrated activity of its organs. For instance, digestive system organs cooperate to process food.
