

# AJIAL BILINGUAL SCHOOL GRADE 5 NEWSLETTER

Dear Family,

This week in English Language Arts students will be writing and illustrating their realistic fiction stories. This activity will help students determine the small moments in their lives worth writing about. It will allow students to progress more independently as they write a fictional story. Throughout the week students will focus on drafting, revision work, editing and presenting.

In Grammar we will be reviewing all of the Grammar lessons taught to date.

In our Math classes we will be reviewing decimal multiplication and division. We will also be practicing estimating decimal products and decimal quotients.

This week in Science we will be doing unit review. We will be discussing environmental problems and how they affect us. The activities in this unit provide students with opportunities to develop skills such as observation, critical thinking, communication, and creativity.

*The summative assessments will be the week of January 9th - 13th. Attendance is mandatory.*

*All students should come to school wearing a mask and they should have at least 2 extras in their bags.*

*New school uniforms are mandatory as of January 2<sup>nd</sup> except on PE days when students should come to school wearing their PE kits.*
