

Grade 5 Newsletter

Week 36: May 3-7, 2026

Message from the Grade 5 Team:

ELA: *“What does it take to settle in a new land?” That is the big question we are exploring in Unit 6. To answer it, we are reading, writing, and talking about the history of the western United States. Be a part of our exploration! With your child, read the new words and talk together about the history of your town or country. Share what you know about how and when it was settled. Try to use some of the new words in your discussion.*

Math: *This week, we are beginning an exciting new unit on Geometry. Students will explore the properties of shapes, lines, and angles. Through hands-on activities, visual models, and problem-solving tasks, they will learn how geometry connects to real-world situations and everyday problem-solving.*

Science: We continue our journey into the amazing world of Space Exploration, asking the big question “What is Space?” This week we will explore Earth’s rotation on its axis and its revolution around the sun.

REMINDER

“EXIT TICKET” TASKS will be conducted randomly throughout the week for English, Math and Science.

ATTENDANCE to all lessons is compulsory

English Language Arts

Reading Selection: “A Day in the Life of a Cowboy” page 109-115

Essential Question: What does it take to settle a new land?

Reading strategy: Learn to visualize

Content Vocabulary: construction, gold, rush, ranching, reservation, settler
